Acknowledgments

We want to express our gratitude to the school library media specialists, university professors, and friends who supported us throughout this project. First, we want thank the 20 library media specialists who provided the model programs and ideas that are shared in Chapter 8. Without their wonderful program ideas, there would be no book, as their section is the heart of this particular how-to guide. It is our hope that other school library media specialists will want to try these programs in their own library media centers.

The professors in the School of Education at the University of Houston—Clear Lake shared generously of their time and knowledge. Their patience with constant questioning, their sharing of ideas, and their enthusiasm for the project are much appreciated.

Ms. Ann Kimzey, Dr. Ken Black, and Dr. Maureen White were always there to advise us and provide the support we needed. Their encouragement and confidence in our project are sincerely appreciated. The book could never have been completed without the technological skills of Mr. Isidro Grau; the secretarial skills of Mrs. Vera Fluker; and the support of Jerry Roberts, Dora Rhodes, and Wendell Wilson. Their dedication to the project is much appreciated. We particularly want to thank Julie Hardegree and Kit Chiu for the numerous hours they spent searching the Internet for outstanding Web sites.

Although many school library media specialists were involved in this project, we want to extend a special thank you to the University of Houston—Clear Lake students who completed their School Library and Information Science internships during the summer of 1999. They worked diligently, examining model programs in various school districts. We also want to thank Dr. Barry Bishop, Kay McBride, Jay Stailey, and Sarah Wahl for providing us with so much support throughout the project.

Finally, we want to extend our sincere gratitude to our project editor, Rich Lane at Libraries Unlimited, who was always available to answer our numerous questions. His commitment to the project made the whole thing work. Never too busy to discuss the project or answer questions, Rich spent much time on the telephone and through e-mail discussing the book with us and refining our chapters.
